

PRODUCTS & SOLUTIONS

ubrusi.com

Godina d.o.o. was founded in 1996 as a trading company, and over time, through investments and expansions, it has grown into a company that includes a factory for the production and processing of hygienic paper.

Our strategic choice is to constantly raise the quality of products and services in servicing clients, as evidenced by the latest technology we use in everyday work. The global situation, as well as market research, has contributed to our determination that all our products meet the needs and standards of a wide range of users and at the same time affect the preservation of a healthy environment and environmental norms.

GODINA TODAY

The company Godina d.o.o. is one of the significant regional players in the production and distribution of paper products and related equipment.

We want and can do more and better because what drives us is the simple idea of being a first-class partner for personal and professional hygiene solutions.

Innovation in business and the application of modern technologies in the production process of paper towels and toilet paper are the keys to our success.

Our goal is to provide innovative solutions to protect health. That is why we have directed all our forces towards that goal.

We have invested in it our knowledge and experience, years-built reputation and respect that we have gained through dedicated and hard work.

**MORE THAN TWO DECADES
IN PAPER PRODUCTION**

Vision

Entrepreneurial spirit and solutions in the field of personal and professional hygiene, on whose improvements we work almost every day, are our professional choice. The concept of work and the standards that are applied are recognized and adopted, both in our territory and more and more in the countries to which we export products. Our need and our goal are to expand the market and network of satisfied customers.

Mission

Our values - respect, commitment and sustainability, as well as our long-term success, are closely intertwined. Constant product innovation and a feel for market trends and needs are the basis of our success. Long-term relationships with our customers and suppliers are based on trust and partnership.

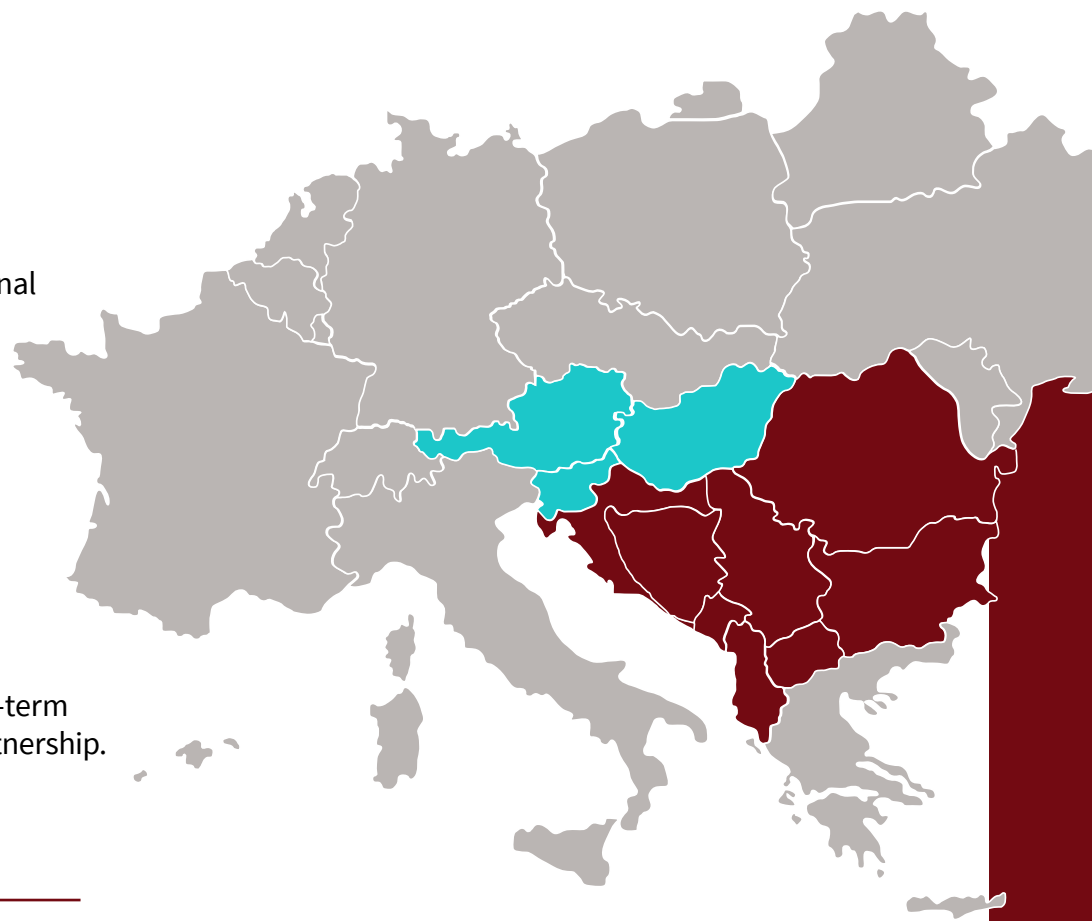

GENERAL INFORMATION

The entire team of the company Godina d.o.o. consists of more than **twenty employees**.

More than **seven automatic machines** for the production of folded paper and paper rolls.

Warehouse space of **2,000 m²** for storage of raw materials and about **1,500 m²** of warehouse space for storage of finished products.

Our **showroom** with exhibited products is located in the center of Belgrade at the address Kraljice Natalije no. 45, where our customers can see and try all the products from our plant with a professional team of merchandisers, who are there to provide support and advice.

Countries where we
are present

Countries where we plan to expand
our business in 2022-2023

RESPONSIBLE BUSINESS

GODINA doo has successfully implemented and certified the quality management system ISO 9001: 2015, the environmental management system ISO 14001: 2015, and the occupational safety and health management system ISO 45001: 2018, thus bringing our business in line with international standards. Sustainability supports the company's overall business goals and consists of three important parts - social, environmental and financial responsibility. We are proud of the fact that Godina d.o.o. is a socially responsible company, which invests in the community and cares for the environment.

Management of raw materials and suppliers

Most of the cellulose used in our production is obtained from sustainably managed forests. We are committed to sustainable forest management - Chain of Custody management and reliable forestry certifications such as PEFC or FSC. In this way, we ensure the sustainability of raw materials supply of our plants and delivery of products to our customers that are recyclable.

Resource efficiency and energy management

Our ambitious goals for day-to-day operations within the production chain include maintaining biodiversity, reducing process water consumption, fossil CO2 emissions and waste reduction, as well as improving energy efficiency.

Employees and society

Welfare and safety are especially important to us in GODINA. Ethical business practices are our top priority; open and transparent communication is important to us in this regard. We act responsibly and thus want to improve the quality of life for all.

Sustainable choice

All our products are sustainable alternatives to many CO2-intensive products and raw materials. We offer a versatile environmental footprint, from forests to delivery, and to recycling.

WE ARE HERE FOR YOU

- **To make the product available to you**
- **To offer you the best choice**
- **To give you the best advice**
- **To help you decide**

EACH TARGET GROUP EXPECT A CONCRETE SOLUTION

A higher level of expectations means demand for better quality towels, as well as nice and high-quality dispensers and accessories.

The increased number of visitors in toilets requires higher capacity dispensers and paper products adapted to a specific use.

It is the paper and the dispenser that together create the optimal solution for your needs:

- A solution that seems pleasant for toilet users and service staff to refill paper, clean facilities, and do all maintenance.
- A solution that makes hygiene facilities clean, fresh and tidy. A well-maintained space exudes attention.
- A resource-saving solution. It always pays to use products that work optimally. They bring the best results.

PRODUCTS

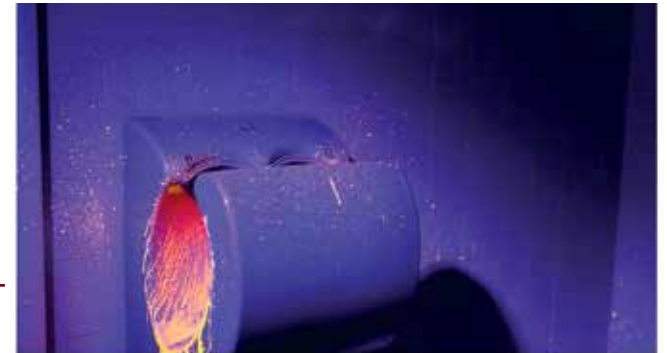

SCIENTIFIC STUDIES HAVE SHOWN PAPER TOWELS ARE THE MOST HYGIENIC OPTION FOR HAND DRYING

In times of unprecedented health crisis, it is important that users are fully informed about the hygiene risks posed by hand dryers and that they can read the results of scientific studies before using or purchasing this type of hand dryer.

The hand dryer with impulse air sprays from hands droplets of water that can contain germs, up to 2 meters¹. These aerosol bacteria can survive for up to **15 minutes in the air**. Impulse air hand dryers can increase the level of bacteria on the fingers by up to **42%**³. The hand dryer spreads **1300 times more germs** than a paper towel². Even with “Hepa” filters, as well as careful cleaning and maintenance, hand dryers do not clean hands and toilets as good as paper towels. After 15 minutes, **100 times more particles remain in the air** when hand dryers are used compared to disposable paper towels⁴. Drying with paper towels **reduces bacteria on the fingers by up to 77%**⁵. The inner surfaces of the hand dryer with pulsed air can contain up to **48 times more bacteria** than a toilet seat⁶.

TAKING INTO ACCOUNT ALL THESE FACTS, “WHO” HYGIENE RECOMMENDATIONS RECOMMEND PAPER TOWELS FOR HAND DRYING.⁷

A recent study showed that 90% of people who use sanitary facilities prefer paper towels when they have a choice between disposable paper towels and hot air hand dryers⁸.

Paper hand towels offer the best solution for hand hygiene and general hygiene in sanitary facilities.

GODINA PROFESSIONAL DISPENSERS

A toilet you can proudly present to the outside world is good for your business. The feeling that you care about the details means a lot to your customers who will gladly return. Your employees and guests will be healthy and satisfied.

Our complete range of dispensers makes it easy to design a dream bathroom for visitors - and cleaning staff.

Godina Professional dispensers are planned down to the smallest detail - to meet the need for comfort and reliability in all toilets. Dispensers offer a variety of intelligent technical solutions for minimum consumption and facilitated maintenance.

Our new state-of-the-art dispensers are extremely functional in design and suitable for almost every user.

The dispensers are light and ergonomic to use. Innovative features make the dispensers much more practical for filling and maintenance, and this brings great relief to the daily work of maintenance personnel.

The range contains well-matched products that are perfect for everyone's field of application.

**The only decision you need to make
is white or black.**

GODINA PROFESSIONAL PRODUCTS: FOR HIGH-TRAFFIC TOILETS

A complete range that includes functional, robust dispensers and appropriate hand towels and toilet paper.

The dispensers are elegant, durable and very easy to fill.

They control the use of paper and present to the user only a clean and previously intact product.

This not only minimizes consumption and with it your costs, but also allows you to offer a complete hygiene solution.

G884 Carbon

GODINA PROFESSIONAL FOLDED PAPER TOWELS HANDS HYGIENE WITH SERIOUS BENEFITS

Control consumption and you will control costs

A one-by-one dispenser helps control consumption and reduces waste, maintenance effort and the number of refills.

25%

Savings are achieved by using folded towels compared to classic ones.

Reduce sick leave and the spread of transmitted diseases

The dispenser system ensures that customers only touch the towel they use, preventing contamination and transmission of germs.

100 million

People get sick every year from transmitted diseases.

Prevent the spread of germs

Hygienic, non-contact dispensers improve hygiene and increase the perception of cleanliness in toilets where “less contact” is highly desirable.

Every one of us spends part of our lives with the flu or cold

Waste reduction helps businesses and the environment

Dispensers with a “one by one” system with more durable towels with higher absorption power significantly reduce the amount of waste you produce in your toilets.

33%

Less waste is generated using folded towels

G903 Carbon

G903 White

Dispenser for folded paper towels

„V SKIN 750“ dispenser for “V” or “C” folded paper towels

- Capacity of 750 “V” sheets
- Dispenser dimensions (mm): 410 x 141 x 320
- The same key fits all • Controlled use, one sheet at a time
- Transparent sides show how much paper is left at a glance
- Controlled consumption and high capacity
- The spirit level on the back panel makes it easy to level the dispenser

Dispenser paper towel dispenser with “V” and “C” folding, guarantees design and functionality thanks to the attention to detail and the use of raw materials with high-quality standards.

Our dispensers always include an assembly kit. Made in Italy.

GODINA PROFESSIONAL - TABLE NAPKINS

Within bars, fast food restaurants, pizzerias and many other types of businesses operating in the restaurant sector, customers need to be provided with paper napkins for hygiene and cleaning purposes.

- These multifunctional napkins are soft and have great absorbency.
- Napkins that you pull out of the dispenser are clean, dry and always hygienic.
- Filling couldn't be easier with our new napkin dispensers.
- Dispensers have a rubber anti-slip pad and springs for easy access to the napkins.
- Transparent design allows you to see at a glance how many napkins are left.

All napkin dispensers have space for inserting labels, which help you to personalize your dispensers.

GODINA PROFESSIONAL INDUSTRIAL ROLLS AND DISPENSERS - FOR ALL SURFACES

In industrial workplaces, employees need paper towels and dispensers that can withstand the demands of professional use.

The requirements of different industrial drying products are often complex - after all, one type of towel cannot meet all the needs of the industry. The product should be suitable for cleaning, wiping and polishing - and versatile enough for use on a variety of surfaces and with a variety of impurities.

That is why Godina has developed different towels for different professional requirements. As important as it is to keep machines and equipment in good working order, it is equally important to give employees the means to protect their hands from dirt, oil, grease and chemicals.

For every industry

Working in industrial facilities requires specially designed professional wiping and cleaning solutions that take into account the different requirements of the industry.

For all surfaces

Professional wiping requires different characteristics, depending on what is being cleaned, what the surface is like and what the desired result is.

Godina – for all needs

Godina Professional product range is continuously tested and developed. This includes the right solution for all professional and industrial wiping requirements

HAND HYGIENE IMPORTANT PREVENTIVE MEASURE

Why is hand hygiene important? Proper and regular hand hygiene, i.e. regular hand washing is a good, simple and cheap way to prevent the spread of many infectious diseases that can be transmitted by dirty hands, such as the common cold, flu, infectious diarrhea and contagious hepatitis.

How can we prevent the spread of pathogenic microorganisms?
Regular and proper hand washing will prevent the spread of infectious diseases that can be transmitted by unclean hands. The habit of regular hand washing should be instilled in the habits of behavior in early childhood.

G911 Carbon G911 White

- Filling version, capacity Lt 1,2
- Inner container with lid

The liquid soap dispenser, equipped with photocell activation, guarantees maximum hygiene and prevents product wastage. Works with 4 'AA' batteries - not included.

HYGIENIC HAND DISINFECTION

For this purpose, there are several products on the market that contain one or more disinfectants based on ethyl alcohol or isopropanol. These products are used after standard hand washing for antiseptic purposes, especially in hospital conditions, and thus, after an ordinary, regular hand wash, the number of microorganisms, so-called transient flora, is further reduced to a minimum.

They are applied after washing the hands with soap and water and rubbed into the skin of the hands according to the manufacturer's instructions, usually for about 30 seconds, until the skin dries.

Disinfectants should be chosen carefully, taking into account their active ingredients and characteristics, and should be used only when we want to achieve deep antimicrobial activity on the hands, or when we do not have water nearby.

Disposable medical perforated rolls
High quality, soft and durable
They can be used in healthcare facilities, beauty salons, wellness centers ...

GODINA PROFESSIONAL MEDICAL ROLLS AND HOLDER

Practical disposable products that help maintain hygiene at the highest level.

Ideal for hospital beds, beds in surgeries, cosmetic and massage beds, but also for application in many other circumstances.

These medical rolls are made of quality paper, they are soft to the touch.

G555 Chrome

Medical roll holder, made of steel

- Bracket dimensions (mm): 40 x 210 x 620
- Material: Steel
- Color: Chrome

Ideal for beauty salons and hospitals, where the roll-holder needs to be mounted on the bed.

It can be mounted on any bed in such institutions, regardless of who the manufacturer is.

Stainless steel is great for institutions through which a large number of people pass because the material itself is not susceptible to bacteria retention.

- 18 boxes/pallet

FLUO ANTIBACTERIAL DISPENSERS

They are made of plastic with antimicrobial additives.

Additives inhibit the growth of bacteria on the surface of the dispenser, and as a result, the formation of odors caused by bacteria is effectively reduced.

Due to its natural characteristics, the additive prevents the development of bacteria, fungi and other microorganisms, thus maintaining the hygiene of the space.

The material is robust and can be cleaned and used daily.
